

Case 4 the Case of the Missing Colors

Attention, Detectives... 🕵️🔍🐾👁️

Something unusual has happened in our garden.

This morning, the colors... disappeared.

🦋 The butterflies lost their shimmer.

🌻 The flowers forgot their hues.

🌅 Even the sunrise seems unsure of itself.

But I, Skunkly Luke, have found clues.

Tiny trails. Strange giggles. A mystery waiting to be solved.

Today, YOU are my detectives.

You will search. You will question. You will solve.

And maybe... just maybe...

you'll discover that not every mystery has a villain.

Now gather your teams, sharpen your minds...

and try not to get distracted by butterflies.

(...pause, look around...)

...No promises on that last part.

Let the investigation begin.

The first clue: “The colors are gone from petals so bright, I used to glow yellow in warm morning light.

I turn to the sun to help things grow...

without my color, what do you know?”

📖 Learning Moment:

Green and colorful parts of plants help them use sunlight to grow (no color = no energy = plants can't thrive)

🎮 Action:

“Be the flower!”

Everyone turns toward the “sun” ☀️

💡 “Colors help plants live and grow!”

Answer: Daisy

🕵️ CLUE #2 🕵️

The colors are gone... but not by mistake,
they were gathered carefully, piece by piece to take.
Not scooped up quickly or tucked away...
but studied, watched... in a thoughtful way.

What kind of animal is known for being
quiet... curious... and clever?

🕵️ FINAL CLUE 🕵️

Not wings above...
Not paws that grab and stash...
But something low in the grass...
quick as a whisper, gone in a flash.
Known in stories for being clever and sly...
a flash of red as it passes by.
